SecuLobby SMART VMS SOLUTION TO MANAGE YOUR VISITORS

SecuLobby is a leading web based visitor management system which gives an intuitive sign-in experience with unmatched security SecuLobby allows the visitors to check-in digitally eliminating the manicpaperwork. The solution improves security by enabling organizations to identify exactly who is in their facilities, while enhancing the professionalism of an organization by streamlining the visitor check-in process. Key features of the solution include visitor tracking, badge printing, automatic notifications, access control integration and reporting. Visitor logs are tracked by adashboard, provided to the authorities and it centralizes your guest registrations at one place

About SecuLobby

SecuLobby serves businesses of all sizes across various industries. The software is particularly useful for large enterprises with several locations, multi-tenant buildings, healthcare, law, government offices and education

OUR VISION

We are dedicated to empowering organizations with technology. We see ourselves as architects, designing the future of visitor management. We want to inspire organizations that leverage visitor data for a greater purpose.

OUR MISSION

To give organizations, the most efficient digital visitors' management system andimprove the guest experience and last but not the least keep it environmentally safe by removing the use of paper completely.

FEATURES

EASE OF USE

The design of our platform is very user-friendly and easy to navigate. The registration process is very straightforward for both iOS and Android platforms.

EMIRATES ID INTEGRATION

Visitors can check-In by scanning emirates ID to fastest visitor sign-in.

EASY RETURNING VISITOR OPTION

VMS makes the registration of any repeat visitor very simple. Any repeat visitor can register by simply entering their contact number or mobile number or Emirates ID.

VISITOR BADGES

VMS prints custom visitor badges that help operators easily recognize visitors as well as their credentials, clearance levels, and access durations.

VISITOR IMAGE CAPTURE

For security reasons, VMS automatically captures an image of every visitor to your facility and store them securely with the visitor data in the cloud for easy retrieval.

REAL-TIME VISITOR LOG

VMS provide live visitor log that is always up to date and displays every single detail of your guests on a single click.
